1. Survey

Dear user

We, at mon.itor.us are committed to deliver free, but exceptional monitoring service to our customers. We want you to have a complete, easy to use and community-driven systems monitoring and management service. For the reason we kindly ask your feedback with a short 4-question survey. The survey invites you to share with us what you like and dont like in our service and what you want to have in the future releases. Please go <http://www.surveymonkey.com/s.asp?u=298483644357> for the survey and use the same email as your mon.itor.us account.

All the respondents will get 1 month free usage of our new premium service (the release is planned end of April).

2. HTTP password protected sites monitoring

mon.itor.us is happy to announce that from now on you can monitor your HTTP password protected sites using our HTTP check. We were receiving many feedbacks from our customers regarding the monitoring of such kind of sites. Before, if you were adding HTTP check to monitor your password protected site you were receiving only NOKs, because we were not supporting that in our HTTP check. So we added that feature to satisfy our customers needs as much as we can.

3. Saving locations in report, snapshot, statistics and test modules

Due to requests from many of our users, we have added the possibility to save the location in snapshot, report, statistics and test modules. So the next time you open your mon.itor.us page you will see the results from the locations you selected and saved during your previous visit.

We designed MON.ITOR.US to provide our users with the best monitoring experience and built a community around it. We need your participation to deliver that vision:

If you are happy with the service please submit a testimonial using a Testimonial link in the application menu. If you have a suggestion or need help please use Feedback link or use our forums. If you want to share your experience with your contacts please use Recommend Friend link. Please bookmark us on social bookmarking sites like del.icio.us and others, as well as digging and posting articles in blogs.

We are committed to providing the best monitoring experience for free. We are financing the free service via advertisements and our premium service. The more visitors we get on our site the more we can invest for our user satisfaction.
